

MARKETING SERVICES MENU

Consultation

\$30/hr

We discuss your business and depending on the size of your company and amount of marketing you've already accomplished, I help you determine: your target market, mission statement, tagline/motto and avenues of marketing that would most effectively and efficiently benefit your company. I could recommend a number of networking strategies both on and offline. To ensure success, I will schedule times to check in on your progress and guide you to your goals over time.

Set Up

\$30/hr

I set up any online accounts your company might benefit from: including uploading information about your company, photos, contact information, links leading traffic back to your website and interest-generating status update suggestions.

Maintenance

\$30/hr

I maintain and keep information up to date on each online account, either based on an agreed upon schedule created by both parties or upon occasional request. I continuously suggest interest-generating status updates or offers that could be posted routinely.

I charge \$30 per hour for all of the above services, due to the speed at which these services are completed.
